ABOUT ME

I have over six years of experience working as a front-end engineer and more than five years as a remote employee with a great track record of deliverability.

For the past three and a half years I've written hundreds of Typescript PRs for the Disney+ streaming service and others in the Disney family such as Hulu and ESPN+, used by millions of users across the globe.

EXPERIENCE

Frontend Engineer   *Remote*
Disney (@Hypergiant)   *2021-present*

- Led the efforts to unify and migrate the customer activations feature while adding value with the newer HBO max partnership.
- Developed a developer tool that communicated with the third party activations API and allowed both developers and testers to streamline the activations testing process.
- Took ownership of a legacy in-house analytics library, refactored and maintained it for more than 100 peers to use.
- Wrote a command line interface tool to avoid manually updating the configurations of 132 countries, taking the time of a gruesome two-hour task to a minute.

Frontend Developer   *Remote*
Airfleet   *2020-2021*

- Developed pixel-perfect websites using Gatsby.
- Fixed and improved scroll animations, increasing load time and lighthouse scores and overall SEO ranking.

Frontend Developer   *Remote*
CraCSS   *2019-2020*

- Developed the company's marketing website while learning Svelte.
- Led the frontend efforts on a user-facing product to make church seat reservations during the pandemic.

Full Stack Developer   *Cordoba, Argentina*
Cordoba Experts   *2018-2019*
